- JPanel and Applet use _____ as their default layout
Ans: FlowLayout
- Which are various AWT controls from following?
Ans: Labels, Push buttons, Check boxes, Choice lists.
- Which of the following component class cannot be add on applet
Ans: Menu
- A checkbox is a control that consists of a _____
Ans: Combination of a small box and a Label
- "A Frame's _____ designates the area of the frame excluding the title, menu bar and the border."
Ans: ContentPane
- A GUI stands for _____.
Ans: Graphical User Interface
- A JCheckBoxMenuItem is a subclass of _____.
Ans: ?????
- A label is a simple control which is used to display _____ on the window
Ans: Text(non-editable)
- A ScrollPane is _____.
Ans: Container
- "A superclass of Textfield and TextArea classes that is used to create single-line , multiline textfields respectively is _____.
Ans: Textcomponent
- A _____ is a component that appears as a group of folders in a file cabinet.
Ans: JTabbedPane
- A _____ automatically arranges the components added to a container.
Ans: Layout Manager
- A _____ is a passive AWT control which do not generate any event.
Ans: Label
- A _____ component is a display area for a short string of text, image or both.
Ans: JLabel
- All Component on Container can be removed by calling following method
Ans: removeAll()
- All swing component classes are placed in
Ans: javax.swing
- An Applet is _____ of Panel
Ans: subclass
- Applet Container is used to prepare _____ output window.
Ans: ?????
- AppletViewer tool is available in which of the folder of JDK
Ans: bin
- Arranges the components as a deck of cards such that only one component is visible at a time
Ans: CardLayout
- At the top of the AWT hierarchy is the _____ class.
Ans: Component

Sanjivani Rural Education Society’s Sanjivani, KBP Polytechnic, Kopargaon		Important Questions	Year: 2021-22

22. AWT classes are contained in the _____ package
Ans: java.awt
23. AWT is used for creating a GUI in Java. AWT stands for
Ans: Abstract Window Toolkit
24. AWTEvent Class is define in following package
Ans: java.awt
25. A_____is Componenet that represents a hierarchical view of data
Ans: Jtree
26. A_____is component that presents a rectangular area in which a component may be viewed
Ans: Scroll Pane
27. BorderLayout is divided into_____regions
Ans: five
28. BorderLayout class has _____regions to add components to it
Ans: Five
29. By default flowlayout uses _____justification.
Ans: Center
30. By default page-up and page-down increment of scrollbar is_____.
Ans: 10
31. By default the Frame has a _____
—
Ans: Titlebar,borders,resizing corners
32. By default which layout manager is set on applet
Ans: FlowLayout
33. By which method You can set or change the text in aLabel?

- Ans:** setText()
34. Canvas is a _____
Ans: Window
35. Checkable menu items are created using object ofclass.
Ans: CheckboxMenuItem
36. Combobox is a combination of _____
Ans: TextField and Dropdown List
37. Components are added to which pane of swing JApplet.
Ans: ContentPane
38. constructors of Jseparator are
Ans: both i and ii
39. Container is the sub class of?
Ans: Component
40. Control not support by awt are
Ans: TabbedPane,Table
41. Current text of label can be obtained using _____.
Ans: getText ()
42. Deafult layout manager for Frame is _____.
Ans: BorderLayout
43. Default layout manager for panel is
Ans: FlowLayout
44. Default layout manager for Window is
Ans: Borderlayout
45. Default Layout of Frame
Ans: BorderLayout
46. Default orientation of progress bar is:
Ans: Horizontal
47. "Double-buffering built in, tool tips, dockable tool bars, keyboard accelerators, custom cursors, etc.

48. are new features of _____?"

Ans: Swing

49. Each menu is associated with a _____ list of menu items

Ans: Drop-down

50. Every layout manager is an instance of _____.

Ans: the LayoutManager interface

51. Executable applet is nothing but _____ file of applet

Ans: .class

52. FileDialog is which kind of dialog box?

Ans: Modaltype

53. FlowLayout arranges components from

Ans: Left to Right

54. FlowLayout does not support this value of alignment...

Ans: FlowLayout.BASELINE

55. Font class is available in _____

Ans: java.awt package

56. For adding controls to a window, we use following method

Ans: add()

57. for using Swing control one must import _____ package

Ans: import javax.swing.*

58. Frame is a standard window, which is _____ of Window class from AWT hierarchy

Ans: sub class

59. getContentPane() method of which class

Ans: JApplet

60. getSelectedCheckbox() method of which class

Ans: CheckboxGroup

61. How can the Checkbox class be used to create a radio button in AWT?

Ans: By associating Checkbox objects with a CheckboxGroup

62. How do you change the current layout managers for a container?

Ans: Use the setLayout() method

63. How many checkboxes we can check at a time:

Ans: multiple

64. How To Apply Image To Button ?

Ans: Using ImageIcon

65. How would you set the color of a graphics context called g to cyan?

Ans: g.setColor(Color.cyan);

66. Identify the correct constructor of Font class?

Ans: Font(String name, int fontstyle, int pointsize)

67. Identify wrong constructor of Checkbox

Ans: ?????

68. In applet, which of the following tag is used for accepting user defined parameter?

Ans: Param

69. In AWT Checkbox class is used to create _____

Ans: Checkbox and Radio buttons

70. In AWT Radio buttons are created using _____

Ans: CheckboxGroup

71. In FlowLayout manager the default space between each component is

Ans: 5 Pixel

72. In Graphics class Which method is used to set the graphics current color to the specified color?

Ans: public abstract void setColor(Color c)

Sanjivani Rural Education Society’s Sanjivani, KBP Polytechnic, Kopargaon		Important Questions	Year: 2021-22
			Department: Computer Technology

Rev=00 Date: 30-06-2015	Date of Display:		Date of Submission:
Name of Staff: Prof. S.B. Jadhav		Chapter No: 1	Total no of Ques: 319

73. In how many ways we can define the scrollbar?

Ans: ?????

74. In Swing Buttons are the subclasses of which class?

Ans: AbstractButton

75. In Swing the content pane can be obtained via method _____

Ans: getContentPane()

76. In Swing _____ is a component that displays rows and columns of data.

Ans: table

77. In Swing, tables are implemented by the _____ class

Ans: JTable

78. Identify which is a valid constructor of JMenuItem class?

Ans: JMenuItem(String Itemname)

79. Items are added in JComboBox using method.....?

Ans: addItem()

80. JApplet class is Derived form

Ans: Applet

81. Java supports input/output of data through the classes included in the _____ package:

Ans: Java.io

82. JCheckBox is _____ Compon ent

Ans: lightweight

83. JRadioButton is a subclass of _____.

Ans: AbstractButton

84. JTabbedPane class is present in which package?

Ans: javax.swing

85. Jtree class comes under which package

Ans: javax.swing

86. List can be created for multiple selection by using following constructor.

Ans: List(int num,boolean multiselect)

87. Model is the _____ of the MVC architecture.

Ans: bottom most level

88. mouse click will always generate _____ event?

Ans: MouseEvent

89. MutableTreeNode is extends _____ interfa ce

Ans: TreeNode

90. MVC Architecture is

Ans: Model-View-Controller

91. "Name the class used to represent a GUI application window, which is optionally resizable and can have a title bar, an icon, and menus"

Ans: Frame

92. On which side applet always executed?

Ans: Client side

93. Package of drawString() method is

Ans: java.awt

94. Panel is defined as

Ans: All of above

95. Panel is used for _____ components

Ans: Grouping

96. Plugable Look & Feel is the feature of

Ans: Swing

97. Positions the componenets into five regions: east, west, north, south, center

Ans: BorderLayout

98. Program which executes applet is known as _____

Sanjivani Rural Education Society’s Sanjivani, KBP Polytechnic, Kopargaon		Important Questions	Year: 2021-22
			Department: Computer Technology
ACAD/F/	Subject: Advanced Java Programming [22517]		Pages: 1
Rev=00 Date: 30-06-2015	Date of Display:		Date of Submission:

- Ans:** Appletviewer
99. public class MenuBar extends _____
Ans: MenuComponent
100. Scrollbar() creates a _____ scroll bar by default.
Ans: Vertical
101. Select the proper constructor of FileDialog
Ans: FileDialog(Frame parent, String boxName)
102. Select the proper syntax to addcomponent in an applet
Ans: Component add(Component comoObj)
103. setBorder() method is used to set a border for _____?
Ans: Jcomponent
104. setMenuBar() method of which class
Ans: Frame
105. State true or false i) AWT is an extended version of swing ii) Paint() of Applet class cannot be overridden
Ans: i-false, ii-false
106. Swing components are
Ans: lightweight and platform independent
107. swing is the set of _____ that provides more powerful & flexible components as compare to AWT.
Ans: Classes
108. Text field usually called as
Ans: edit control
109. TextField class is used for _____
Ans: Single-Line text-entry area
110. The Applet class is inpackage
Ans: java.applet
111. The AWT container is an instance of the _____ class which holds various components and other containers
Ans: Container
112. The CardLayout class defines the following constructors:
Ans: CardLayout() // First
Cardlayout(int hor, int ver)//second
113. The CardLayout class manages the components in such a manner that _____ component is visible at a time
Ans: Only one
114. The concept of the menu bar can be implemented by using three java classes—
Ans: ?????
115. The coordinate of the upper-left corner of a frame is _____.
Ans: (0, 0)
116. The correct hierarchy for panel is
Ans: Component-Container-Panel
117. The default layout manager for the content pane of a swing based applet is
Ans: Border-Layout
118. "The following specifies the advantages of
Ans: It is lightweight. It supports pluggable look and feel.
119. It follows MVC (Model View Controller) architecture."
Ans: Swing
120. The method drawRect() is used to display an _____
Ans: outlined rectangle

Sanjivani Rural Education Society’s Sanjivani, KBP Polytechnic, Kopargaon		Important Questions	Year: 2021-22
			Department: Computer Technology
ACAD/F/	Subject: Advanced Java Programming [22517]		Pages: 1
Rev=00 Date: 30-06-2015	Date of Display:		Date of Submission:
Name of Staff: Prof. S.B. Jadhav		Chapter No: 1	Total no of Ques: 319

121. The method setLabel can be used with what type of Object ?

Ans: TextField.

122. The method_____gets the text of the button jtb is

Ans: jtb.getText()

123. the method_____places a menu mu into a menu bar mb.

Ans: mb.add(mu)

124. The method_____sets the foreground color to yellow in JFrame

Ans: f.setForeground
(Color.YELLOW)

125. The method

_____creates a
IconImage for file c:\image\us.gif
Ans: new
ImageIcon("c:\image\us.gif");

126. The method

_____gets the text
(or caption) of the label jlbl
Ans: jlbl.getText()

127. The setBackground() method is part of the following class in java.awt package:

Ans: Component

128. The string parameter to the JButton constructor tells

Ans: what text will appear on the button

129. The Swing component classes that are used in encapsulate a mutually exclusive set of buttons are?

Ans: ButtonGroup

130. The syntax for drawRect() method is

Ans: drawRect(int top, int left, int width, int height)

131. The TextArea controls create a _____respectively.

Ans: Multi-line text

132. the various Control Supported by AWT are

Ans: ?????

133. The various controls supported by swing are:

Ans: ?????

134. The_____arranges components in rows and columns and makes all components the same size.

Ans: GridLayout manager

135. The_____interface is used to handle button events:

Ans: ActionListener

136. The_____class is used to create radio button in AWT

Ans: CheckboxGroup

137. The_____Can be used to enter or display a string

Ans: textfield

138. "These four methods commonly used in? 1)public void add(Component c) 2)public void setSize(int width,int height)

3)public void
setLayout(LayoutManager m)
4)public void setVisible(boolean)"
Ans: Component class

139. To create window with title bar which of the following class is used?

Ans: Frame

140. To create file dialog box _____class is used

Ans: FileDialog

141. To display text on the applet _____method is used.

Ans: drawString()

Sanjivani Rural Education Society’s Sanjivani, KBP Polytechnic, Kopargaon		Important Questions	Year: 2021-22
			Department: Computer Technology
ACAD/F/	Subject: Advanced Java Programming [22517]		Pages: 1
Rev=00 Date: 30-06-2015	Date of Display:		Date of Submission:
Name of Staff: Prof. S.B. Jadhav		Chapter No: 1	Total no of Ques: 319

142. To draw a line in applet, we use following method

Ans: drawLine()

143. To fetch caption of button_____method is used.

Ans: getLabel()

144. To retrieve the current state of a check box, call

Ans: getState()

145. To set title to the frame window_____method is used.

Ans: void setTitle(String str)

146. We can add menus to

Ans: Frames

147. What are controls or components?

Ans: Controls or components allow users to interact with application

148. What are the TextComponent ?

Ans: TextField , TextArea

149. What Are The Types of Dialogbox ?

Ans: modal and Modeless Dialogbox

150. What are the variables defined in Dimension

Ans: height and width

151. What Checkbox method allows you to tell if a Checkbox is checked?

Ans: getState()

152. What does the following line of code do? TextField text = new TextField(10);

Ans: Creates text object that can hold 10 columns of text.

153. What is API

Ans: Application Programming Interface

154. What is default alignment of components using FlowLayout

Ans: FlowLayout.CENTER

155. what is default layout manager for panels and applets

Ans: FlowLayout

156. What is the default layout for a dialog?

Ans: BorderLayout

157. What is the difference between a TextArea and a TextField?

Ans: A TextArea can handle multiple lines of text

158. What is the minimum and maximum of JProgressBar

Ans: minimum -0 Maximum -100

159. What is the use of following method in JDialog? Container getContentPane()

Ans: This method returns, a Content Pane for the JDialog.

160. What is use of 3rd parameter in given constructor

Scrollbar(int,int,int,int,int)

Ans: Thumbsize

161. What is use of second parameter in given constructor Label(String,int)

Ans: specifies the alignment of text in label in terms of pixel

162. what layout manager should you use so that every component occupies the same size in the container?

Ans: GridLayout

163. What letter precedes Swing component names that have a corresponding AWT component?

Ans: J

164. What method is used to prevent a user from changing the size of a Frame() object?

Sanjivani Rural Education Society’s Sanjivani, KBP Polytechnic, Kopargaon		Important Questions	Year: 2021-22

- | | |
|--|--|
| <p>Ans: setResizable(false)</p> <p>165. What methods are used to get and set the text label displayed by a Button object?
Ans: getLabel() and setLabel()</p> <p>166. When DialogBox is closed which method gets called
Ans: dispose()</p> <p>167. When layout manager is disabled , which method is used to determine the shape and position of Component?
Ans: setBounds</p> <p>168. When we invoke repaint() for a java.awt.Component object, the AWT invokes the method:
Ans: update()</p> <p>169. which method is used to set the visibility of the frame?
Ans: setVisible(true)</p> <p>170. which package we need to import while writng swing JRadioButton class
Ans: import javax.swing.*;</p> <p>171. Which abstract class is the super class of all menu related classes.
Ans: MenuComponent</p> <p>172. Which Among the below is not an AWT class
Ans: RadioButton</p> <p>173. Which are the Alignment Constant of Label ?
Ans: All The Above</p> <p>174. Which are the subclasses of the container class?
Ans: Windows,Panel,ScrollPane.</p> <p>175. Which AWT component is not editable?
Ans: Label</p> <p>176. Which AWT control is used for multi-line text entry?</p> | <p>Ans: TextArea</p> <p>177. Which class can be used to represent a checkbox with a textual label that can appear in a menu.
Ans: CheckboxMenuItem</p> <p>178. Which class creates a node in Jtree?
Ans: DefaultMutableTreeNode</p> <p>179. Which class defines the setSize() method ?
Ans: Frame</p> <p>180. Which class encapsulates a blank window upon which we can draw?
Ans: Canvas</p> <p>181. Which class is on the top of the AWT event hierarchy?
Ans: java.awt.AWTEvent</p> <p>182. Which class is used to create a pop-up list of items from which the user may choose?
Ans: Choice</p> <p>183. Which Class is used to get dimension of an Applet?
Ans: Dimension</p> <p>184. Which class is used to represent a single line textbox with password character facility?
Ans: TextField</p> <p>185. Which class provides many methods for graphics programming?
Ans: java.awt.Graphics</p> <p>186. Which componant cannot be added to a container?
Ans: JFrame</p> <p>187. Which component displays information in hierarchical manner with parent-child relationship?
Ans: JTree</p> <p>188. Which component in swing represents data in rows and columns?</p> |
|--|--|

Ans: JTable

189. Which Component of AWT provides a compact, multichoice , scrolling selection?

Ans: List

190. "Which components are needed to get following shown output Figure:-"

Enter Name Her

Ans: Label,TextField

191. which Container use a Border Layout as their default layout?

Ans: ?????

192. Which containers may have a MenuBar?

Ans: Frame

193. Which control is not contain in AWT Package ?

Ans: Scrollpane

194. Which h costructor creates a TextArea with 10 rows and 20 columns ?

Ans: new TextArea(10 , 20)

195. Which is Controll in swing a combination of a text field and a dropdown list

Ans: JComboBox

196. Which is correct method for adding button component into North region of border layout? Assume b1 as button object .

Ans: add(b1, BorderLayout.NORTH)

197. which is default layout Manager for Japplet?

Ans: BorderLayout

198. Which is immediate super class for TextField?

Ans: TextComponent

199. Which is the a constructor of JTabbed Pane

Ans: ?????

200. Which is the correct constructor for JProgressBar

Ans: ?????

201. Which is the correct constructor of GridLayout

Ans: GridLayout(int numRows, int numcols)

202. Which is the immediate super class of Applet?

Ans: Panel

203. Which is the method is used to count the number of items in the list

Ans: getItemCount()

204. Which is true about swing?

Ans: ?????

205. Which is various methods of TextField control from following?

Ans:

getText(),setText(),setEchoChar()

206. Which layout arranges the components as a deck of cards such that only one component is visible at a time

Ans: CardLayout

207. Which layout should you use to organize the components of a container in a tabular form?

Ans: GridLayout

208. Which method exectues only once

Ans: init() method

209. Which method gets the text associated with Label object jlbl?

Ans: jlbl.getText()

210. Which method Is used to add items to JComboBox

Ans: addItem()

211. Which method is used to add tabs to a JTabbedPane?

Ans: addTab()

Sanjivani Rural Education Society’s Sanjivani, KBP Polytechnic, Kopargaon		Important Questions	Year: 2021-22
			Department: Computer Technology
ACAD/F/	Subject: Advanced Java Programming [22517]		Pages: 1
Rev=00 Date: 30-06-2015	Date of Display:		Date of Submission:
Name of Staff: Prof. S.B. Jadhav		Chapter No: 1	Total no of Ques: 319

212. Which method is used to change size and position of Components?
Ans: void setBounds(int x,int y,int width,int height)

213. Which method is used to change the name of a menu item
Ans: void setLabel(String newName)

214. Which method is used to close a swing frame?
Ans: setDefaultCloseOperation()

215. Which method is used to display Label on checkbox?
Ans: String getLabel()

216. Which method is used to set label for Button B ?
Ans: B.setLabel(String s)

217. Which method is used to set the dimensions of the window.
Ans: void setSize(int newWidth, int newHeight)

218. Which method is used to set the layout of the Applet?
Ans: setLayout();

219. Which method sets the size and position of a component
Ans: setBounds()

220. Which method will cause a Frame to be displayed?
Ans: setVisible(true)

221. Which object can be constructed to show and select any number of choices in the visible window?
Ans: List

222. Which of the following applet tags is legal to embed an applet class named Test into a Web page?
Ans: < applet code = Test.class width = 200 height = 100> </applet>

223. Which of the following are not swing componant?

Ans: ?????

224. Which of the following are passed as an argument to the paint() method?

Ans: A Graphics object

225. Which of the following are subclasses of Container Class?

Ans: ScrollPane,Vector,String

226. Which of the following are subclasses of java.awt.Component?

Ans: Container

227. Which of the following are true?

Ans: Panel extends Container.

228. which of the following class is Derived from Container Class?

Ans: Panel

229. Which of the following class act as a super class in class hierachy?

Ans: Component

230. Which of the following components allow multiple selections?

Ans: List

231. Which of the following components does not have visible borders?

Ans: Panel

232. Which of the following contain a Menubar?

Ans: A Frame

233. Which of the following controls does not support interaction with user?

Ans: Label

234. Which of the following creates a List with 5 visible items and multiple selection enabled?

Ans: new List(5, true)

235. which of the following is not a AWT control.

Ans: ButtonGroup

236. Which of the following is not a constructor of JTree

Sanjivani Rural Education Society’s Sanjivani, KBP Polytechnic, Kopargaon		Important Questions	Year: 2021-22
			Department: Computer Technology
ACAD/F/	Subject: Advanced Java Programming [22517]		Pages: 1
Rev=00 Date: 30-06-2015	Date of Display:		Date of Submission:
Name of Staff: Prof. S.B. Jadhav		Chapter No: 1	Total no of Ques: 319

- Ans:** JTree(int x)
237. Which of the following is not a swing class?
Ans: Canvas
238. Which of the following is not active control
Ans: labels
239. Which of the following is not an AWT component
Ans: Applet
240. Which of the following is not true about Dialog Boxes?
Ans: Dialog boxes contains menu bars.
241. Which of the following is not true about Swing Components?
Ans: Heavy weight components
242. Which of the following is not valid alignment constant for Label?
Ans: MIDDLE
243. Which of the following is not valid constructor for JCheckBox?
Ans: JCheckBox(String text, boolean selected, CheckboxGroup group)
244. Which of the following is not valid style constant for Font?
Ans: NORMAL
245. Which of the following is passive AWT control?
Ans: Label
246. Which of the following is the immediate superclass of the MenuComponent class?
Ans: Object
247. Which of the following is true about AWT and Swing Component?
Ans: AWT Components create a process where as Swing Component create a thread
248. Which of the following is used to interpret and execute Java Applet Classes hosted by HTML ?
Ans: Appletviewer
249. Which of the following layout managers need to create a Panel?
Ans: CardLayout
250. Which of the following may a menu contain?
Ans: menu
251. Which of the following may contain a menu bar?
Ans: frame
252. Which of the following method is use to add a button "b" to the south of the applet using BorderLayout?
Ans: add(b, BorderLayout.SOUTH);
253. Which of the following method is used to change the Label caption?
Ans: setText(String s)
254. Which of the following method is used to retrieve icon of JButton
Ans: Icon getIcon()
255. Which of the following methods are invoked by the AWT to support paint and repaint operations?
Ans: repaint()
256. Which of the following methods can be used to change the size of a java.awt.Component object?
Ans: setSize()
257. Which of the following methods can be used to remove java.awt component object from display?
Ans: remove()
258. Which of the following statements about GUI components is wrong ?
Ans: The AWT classes are deprecated

259. Which of the following statements is for placing the frames upper left corner to (200,100)?

Ans: frame.setLocation(200,100)

260. Which of the following swing components donot have an Icon parameter in its constructor?

Ans: JTextField

261. Which of the follwing is constructor of Jtable?

Ans: JTable(Object data[][], Object colHeads[])

262. Which of the method can be used to output a string in an applet?

Ans: drawString()

263. Which of the method Choice class returns a string containing the name of the item.

Ans: String getSelectedItem()

264. Which of the subclasses of java.awt.component?

Ans: Container classes

265. Which Of these Compenent can be added to frame?

Ans: ?????

266. Which of these following is not a component of swing

Ans: List

267. Which of these method cannot be called on JLabel object?

Ans: setBorderLayout()

268. Which of these methods can be used to obtain the reference to the container that generated a ContainerEvent?

Ans: getContainer()

269. Which of these methods can be used to output a string in an applet?

Ans: drawString()

270. Which of these methods cannot be called on JLabel object?

Ans: setBorderLayout()

271. Which of these methods cannot be called on TextArea?

Ans: String getItem(int index)

272. Which of these methods is used to setting the winwods dimension

Ans: void setSize(Dimension new_size)

273. which of these methods use in cardlayout

Ans: add(String s, Component c)

274. Which of these package is used for graphical user interface ?

Ans: java.awt

275. Which of these packages contains all the classes and methods required for event handling in Java?

Ans: java.awt.event

276. Which one is the valid constructor of JCheckBox.

Ans: JCheckBox(Sting s, Icon I, Boolean State)

277. Which one method is used to set the visibility of the frame?

Ans: setVisible(true)

278. Which package use for import the swing components?

Ans: javax.swing.*;

279. Which TextComponent method is used to set a TextComponent to the read-only state?

Ans: setEditable

280. which type of button is belongs to a group such that only one button in the group may be selected at one time?

Ans: CheckboxGroup

281. Which of these events is generated when a button is pressed?

- Ans:** ActionEvent
282. Why are swing component termed as lightweight ?
Ans: they do not depend on native platform
283. Why we use Applet?
Ans: Option A) and B) FROM this
284. Window is super class of _____
Ans: Frame
285. Window, frame and dialog use _____ as their default layout.
Ans: BorderLayout
286. You can construct a JTabbedPane using _____.
Ans: new JTabbedPane()
287. You Can set the alignment of the string within the label by calling _____
Ans: setAlignment()
288. "You want to construct a text area that is 80 character-widths wide and 10 character-heights tall. What code do you use ?"
Ans: new TextArea(10,80)
289. _____ class used to create node in tree.
Ans: DefaultMutableTreeNode
290. _____ dialog box is active input is directed to it until it is closed.
Ans: Model
291. _____ is the Superclass of TextField and the TextArea classes:
Ans: TextComponent
292. _____ Positions are the components into five regions east, west, north , south, center:
Ans: BorderLayout
293. _____ is a Swing class that allows the user to enter a single line of text.
Ans: JTextField
294. _____ is a Swing layout manager that arranges components in a row or a column.
Ans: GridLayout
295. _____ method is used to add items in Combobox.
Ans: addItem()
296. _____ method is used to add the menubar on frame window.
Ans: setMenuBar()
297. _____ method returns currently selected item in choice.
Ans: getSelectedItem()
298. _____ can be used to enter and display a string
Ans: A TextField
299. _____ class is used to create set of mutually exclusive checkboxes.
Ans: CheckboxGroup
300. _____ Layout lays components in a Two Dimensional Grid
Ans: GridLayout
301. _____ arranges the component in rows and columns
Ans: GridLayout
302. _____ creates a dropdown list of textual entries
Ans: Choice
303. _____ this is constructor of List control
Ans: List(int numRows, boolean multipleSelect)
304. _____ controls are platform dependant
Ans: AWT

305. _____ lays out components in a two dimensional grid
Ans: GridLayout
306. " _____ AWT component is used to create popup list of string items from which only one can be selected at a time."
Ans: Choice
307. _____ class is used to display hierarchical data.
Ans: JTree
308. _____ class creates blank sementics free window
Ans: Canvas
309. _____ is not a Swing Component
Ans: CheckboxGroup
310. _____ is the default layout manager for APPLLET.
Ans: FlowLayout
311. _____ class encapsulates AWT events.
Ans: AWTEvent
312. Constructs a new scroll bar with the specified orientation.
Ans: Scrollbar(int)
313. component may have different size rows may have different number of columns.
Ans: GridLayout
314. method is used to append the string str to end of the current text.
Ans: append ()
315. method is used to add a tab to the pane.

- Ans:** addTab ()
316.are responsible for placing components on a window
Ans: LayoutManagers
317.method is used to lock text box components.
Ans: setEditable(boolean flag)
318. A checkbox is a control that consist of a :
Ans: ?????
319. Most Swing components are _____ components because they are rendered and drawn entirely by Java code.
Ans: lightweight
